

2019

We raised \$102, 237 this year to help support our program services. Thank you so much. We couldn't do it without your help.

The board discussed and agreed that the financial impact of COVID-19 may reduce 2020 income from grants, event fundraising and general fundraising. The board agreed to maintain a solid cash reserve to maintain programs through 2020. Cash reserves may be needed for COVID 19 emergency funding grants to hospitals and front line caregivers. \$150,000 has been set aside for research to support commitments from prior years. Further funding will be discussed as events unfold during the pandemic.

A board member attended International Association for the Study of Lung Cancer, American Society of Clinical Oncologist, LungSPORE, Maine Lung Cancer Coalition and the Maine Cancer Foundation annual meetings.
